Properties highlighted in Green indicate properties with investment ratings of 3 or better, darker green shade is for an investment rating of 4 and the darkest green is for an excellent 5 investment rating

Every day multifamily investment properties come off the market. After listening to my investor clients describe their challenges with quickly assessing sales price to value for these properties I decided to do the leg work and provide a summary of some key data and cap rate estimations along with my rating of the investment opportunity from an overview of information provided in the listing along with utilizing neighborhood market rate estimates and expense estimates. This traded listings report will provide a good look at the cap rate and income potential that the buyers can expect from their investment.

Investors should use this summary as a guide to analyze recent trends in the market. You may have your own investment rating based on your risk tolerance levels and investment goals. Table 1 below provides the cap rate ratings used in this report.

| Table 1: Ca | ap Rate Range R | atings               | Table 2:  | Identifies the differ | rent cities and neighborhoods that are included in each of the separate zones.            |

Properties highlighted in Green indicate properties with investment ratings of 3 or better, darker green shade is for an investment rating of 4 and the darkest green is for an excellent 5 investment rating

Every day multifamily investment properties come off the market. After listening to my investor clients describe their challenges with quickly assessing sales price to value for these properties I decided to do the leg work and provide a summary of some key data and cap rate estimations along with my rating of the investment opportunity from an overview of information provided in the listing along with utilizing neighborhood market rate estimates and expense estimates. This traded listings report will provide a good look at the cap rate and income potential that the buyers can expect from their investment.

Investors should use this summary as a guide to analyze recent trends in the market. You may have your own investment rating based on your risk tolerance levels and investment goals. Table 1 below provides the cap rate ratings used in this report.

| Table 1: Ca | ap Rate Range R | atings  | Table 2: | Identifies the diffe | rent cities and neighborhoods that are included in each of the separate zones.            |

Properties highlighted in Green indicate properties with investment ratings of 3 or better, darker green shade is for an investment rating of 4 and the darkest green is for an excellent 5 investment rating

Every day multifamily investment properties come off the market. After listening to my investor clients describe their challenges with quickly assessing sales price to value for these properties I decided to do the leg work and provide a summary of some key data and cap rate estimations along with my rating of the investment opportunity from an overview of information provided in the listing along with utilizing neighborhood market rate estimates and expense estimates. This traded listings report will provide a good look at the cap rate and income potential that the buyers can expect from their investment.

Investors should use this summary as a guide to analyze recent trends in the market. You may have your own investment rating based on your risk tolerance levels and investment goals. Table 1 below provides the cap rate ratings used in this report.
